

Proud UA Members Keeping COVID-19 at Bay

This crew has been amazing during the Covid-19 pandemic. Daily temperature checks to start everyday as seen in the photos and still produce a day's work effectively and efficiently.

This is what their supervisor Nuno Branco had to say about Business Agent Pascal Contant and his crew during this difficult time:

Brother Contant,

Just wanted to mention how professional Our UA and the care it has provided to keep our members updated with ever changing labor laws, rules and regulations to stay essential in this pandemic and providing our clients with the best in the business.....Thank you.

I have also attached photos of our members on the LOPC pump project out at Fort Saskatchewan who have rolled right along with maintaining a safe and diligent, positive and productive working culture. That effort and will put forward to adapt, has shown we can overcome and beat this together. That effort has also led to scope release by the client maintaining our UA presence. Thank you.

Brother Nuno Branco
