

PIPELINE NEWSLETTER

JUNE 2020

Hello Brothers and Sisters,

How do we explain the Global Covid-19 pandemic, oil in the gutter and anything else that could affect our member from going to work? We get all lined up for shut down season, members looking forward to some sustainable work and we are placed on lock down, this directly effecting our members and opportunity to provide for their families.

I believe we have a general handle on the work situation with a new normal on workplace distancing and the wearing of face masks mandatory on work sites. Our members will overcome these small hurdles to get to work and contribute and provide for their families.

Here are my areas of responsibility:

Suncor Base Plant: Currently in shutdown mode for the next 55 days or so. Most hiring completed.

MacKay River Plant: We finished the fire rebuild and the plant is back in production. I would like to thank the members that put forth a solid effort to complete this rebuild, a remarkable job and well done!

Waiward

Aptims

Worley

Stuart Olsen-Laird

***Thank you to the contractors on the rebuild. ***

Firebag Plant:

Tams: Members employment reduced due to Covid-19. Contractor is working slowly to get members back to site as employment opportunities recover.

Fort Hills Plant: Running Status Quo.

I would like to take the time thank my Job Stewards on these projects. You make my job a little easier, keep up that UA PRIDE!

Fraternally yours,

Terry Fraser
